

IVF/ICSI Treatment

NHS Croydon CCG will only fund In Vitro Fertilisation (IVF) and/or Intra-cytoplasmic sperm injection (ICSI) for those with exceptional clinical circumstances via the CCG's Individual Funding Request (IFR) process. More information about this process can be found at the link below:

<http://www.croydonccg.nhs.uk/your-health/Pages/Individual-funding-request.aspx>

A Secondary care clinician/specialist will need to complete the IFR form to confirm the exceptionality of the request. The clinician making the request on your behalf will have access to the form.

This will be considered by the IFR panel and the secondary care clinician/specialist will be advised of the decision.
